Tânia Lopes

Senior Front End Web Developer

taniainteractive.co.uk

taniainteractive@gmail.com

Summary

I have maintained an ongoing role in the professional web design & development industry over the past 12 years. I'm a hard working, resourceful person and passionate about interactivity.

I strive to achieve the best results from every project I undertake. Working as a Front End Developer has enabled me to explore these in various ways, amongst them: problem solving, aesthetics and interactivity.

I have been responsible for the development and maintenance of the HTML templates, as well as implementing new features and functionality to fit in with the objectives and campaigns of the organisations in a fast paced environment. I have been working in an environment with rigorously goals and tight deadlines and maintaining a very high level quality of work.

I develop high-performance, reliable and maintainable code, whether implementing architectural improvements, features, or fixing bugs. I also have experience in debugging complex code and troubleshooting in multiple environments.

My outlook is fresh and open-minded, traits that are reflected in my work. I look forward to each new challenge, confident in my abilities, but always keen to learn and develop.

Specialties

Languages and Skills:

HTML, CSS, LESS, JavaScript, jQuery, PHP, Wordpress, Adobe Creative Suite, Web Development, Web Applications

Professional Experience

Iglu | Where Cool Things Happen
